1. Introduction

The simple calculator is designed for basic mathematical calculations. It performs addition, subtraction, multiplication, and division operations to assist users in day-to-day calculations.

1.2 Features

- Four basic arithmetic operations
- Easy-to-read display
- Compact design

1.3 Basic Layout

The calculator has a numeric keypad, basic function keys (+, -, *, /),

1.4 Display

The display shows the entered numbers and results of calculations.

2. Basic Operations

2.1 Addition

Enter the first number.

Press the '+' button.

Enter the second number.

Press the '=' button to see the result.

2.2 Subtraction

Enter the first number.

Press the '-' button.

Enter the second number.

Press the '=' button to see the result.

2.3 Multiplication

Enter the first number.

Press the '*' button.

Enter the second number.

Press the '=' button to see the result.

2.4 Division

Enter the dividend.

Press the '/' button.

Enter the divisor.

Press the '=' button to see the result.

3. Clear All

Press C to clear all entries and reset the calculator.

4. Error Handling

4.1 Division by Zero

If attempting to divide by zero, "Error" will be displayed.
